

## Function description

PPSB-TH sensorics board is designed for DHTxx air temperature and humidity sensors. It's primary purpose is to simplify sensor connection and installation. Unlike PPSB-T, PPSB-TH **cannot** be used in daisy-chain mode due to communication standard used by DHTxx sensors.

## Pinout

### Pins (DHTxx family):

Pin nr. 1 – VCC (power)

Pin nr. 2 – DATA

Pin nr. 3 – GND (ground)

## Compatible sensors

- DHT11 ([datasheet](#))
- DHT22 ([datasheet](#))

## Absolute maximum ratings

Varies by used sensor.

## Board schematics and layout

Available from PROTOPlant-ELE-RLS repository at [Github](#), or [CadLab.io](#).
